

BAPTISTE GIQUET

30

JUNIOR QA TESTER

Native French speaker with fluent English, a strong gaming background, and hands-on experience building and testing Unreal Engine video games. Used to analysing software, gameplay systems and user-facing features with attention to detail, I bring a practical understanding of how games work, how issues appear, and how to communicate clear feedback.

EXPERIENCE

Self-employed Content Creator & Product Reviewer | Zepae / CustomTonClavier

Location: Caen, France

Dates: 2020 - 2026

- Tested, compared and reviewed technology products for a French-speaking audience.
- Created structured written and video content requiring clarity, accuracy and attention to detail.
- Researched technical information from French and English sources to produce reliable recommendations.
- Built an audience of over 120,000 followers and 25 million cumulative views.
- Managed the activity independently: planning, partner communication, invoicing, reporting and performance tracking.

Hobby Game Developer

Location: Caen, France

Dates: 2023 – Present

- Developed personal game projects mainly using Unreal Engine.
- Built and tested gameplay features, UI flows, interactions and prototype systems.
- Learned to identify issues, reproduce unexpected behaviour and iterate based on clarity, usability and player experience.

Cashier

Location: Caen, France

Dates: 2016 - 2020

- Welcomed and assisted customers in a fast-paced retail environment.
- Followed internal procedures accurately during payment and customer service operations.
- Worked as part of a team.
- Developed patience, consistency and attention to process.

KEY SKILLS

- Languages: Native French, fluent English.
- Tools: Office and Google suite.
- Game development: Unreal Engine 5, Blueprints, C++, Godot, UI flows, gameplay systems.
- Soft skills: attention to detail, clear communication, autonomy, curiosity, patience, teamwork.
- AI-assisted workflows: Advanced use of AI tools for research, documentation, technical problem-solving and workflow automation, including structured prompting, custom skills and sub-agent workflows.

EDUCATION

Scientific Baccalaureate : 2015

- Lycée Victor Grignard – Cherbourg en Cotentin, France

INTERESTS

- Video games: strong gaming culture across PC and console games.
- Game development: personal Unreal Engine projects.
- Technology: product analysis, PC hardware, software and digital tools.
